

How to Re-size an Image in Microsoft Paint

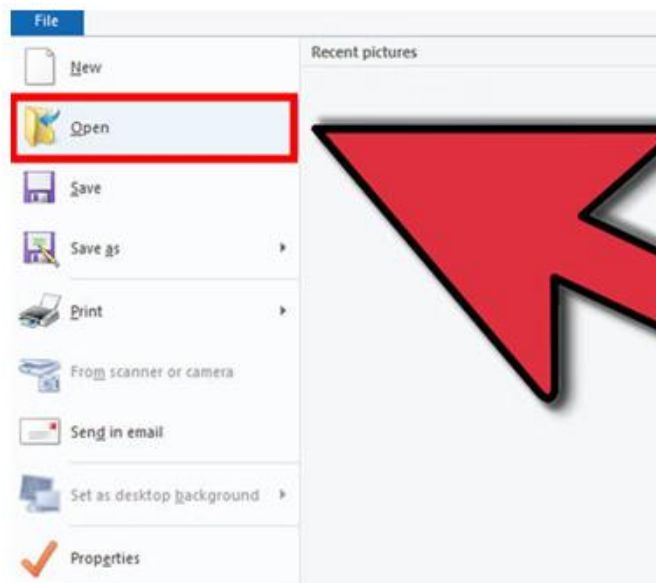

Step 1:-

Click Start->Program -> Accessories->Paint to start Microsoft Paint.

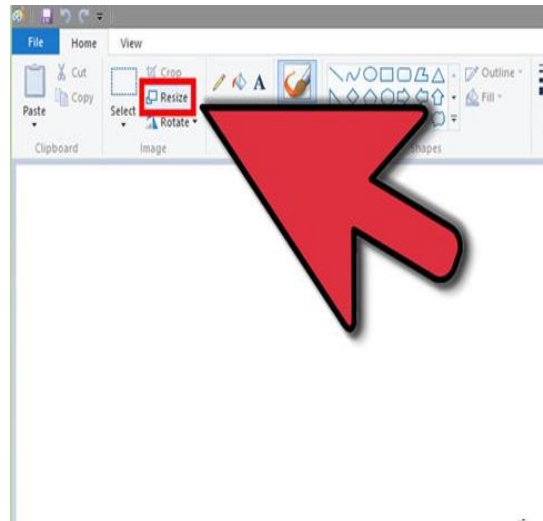

Step 2:-

Open the image file you wish to edit

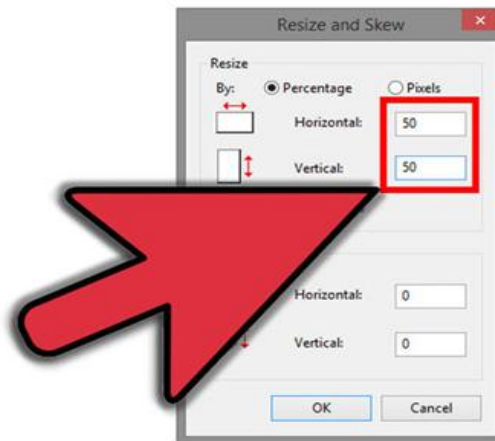

Step 3:-

Click the image menu at the top and select Resize and skew image.

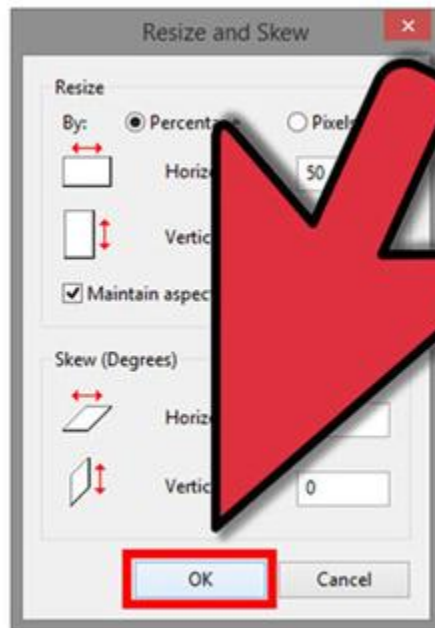

Step 4:-

Choose a percentage figure to resize the image, to avoid distortion, choose the same percentage for the horizontal and vertical stretch.

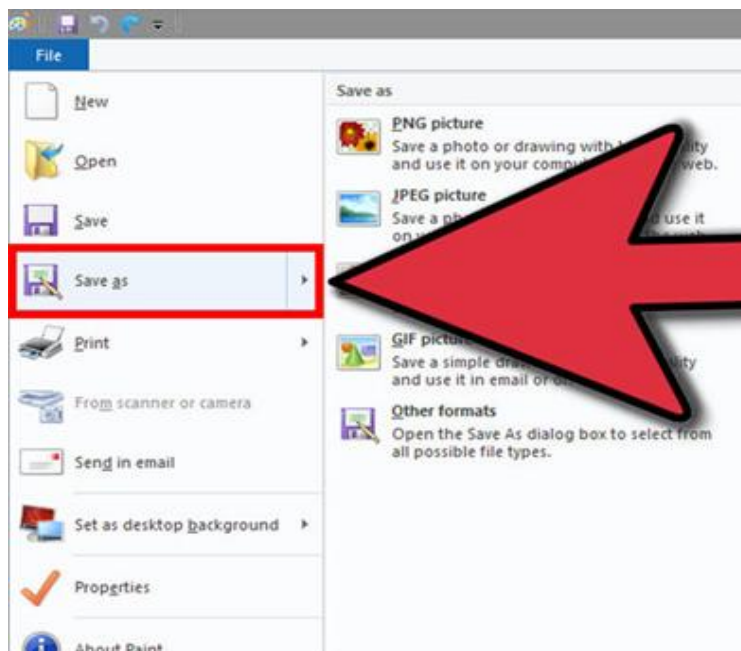

Step 5:-

Click OK.

Step 6:-

Once you have desired size, click File, the save or click save As JPEG.....to prevent overwriting the original image.

Step 7:-

Now Check the size of new image.
